SUMMARY OF STATE NURSERY-STOCK SHIPPING REQUIREMENTS AND PLANT
QUARANTINES AND REGULATIONS AFFECTING INTERSTATE SHIPMENTSNEW HAMPSHIRE

The information contained in this summary was compiled from material received from the plant quarantine official of New Hampshire and has been approved by him. It is issued for the convenience of plant quarantine inspectors, shippers, transportation agents, truckers, and others concerned in the interstate movement of plants, plant products, and other materials subject to State regulation on account of plant pests.

The summary for New Hampshire gives the general requirements for shipping nursery stock into that State. An appendix furnishes information on post-office requirements for mailing plants, as well as terminal-inspection procedure. This summary does not include digests of nursery-stock and plant-quarantine requirements relating to the movement of plants entirely within the State.

The information contained in this circular is believed to be correct and complete up to the time of preparation, but it is not intended to be used independently of or as a substitute for the original texts of the regulations, and it is not to be interpreted as legally authoritative. For detailed information address the State Entomologist, Insect and Plant Disease Suppression and Control, State Department of Agriculture, Durham, New Hampshire.

In addition to State requirements, shippers will need to take into consideration applicable plant quarantines of the United States Department of Agriculture. In most instances these quarantines regulate the interstate movement of specified plants, plant products, and other articles from designated regulated areas. However, some of these quarantines regulate the interstate movement of certain articles into designated protected areas. Copies of such quarantines may be obtained from the Bureau of Entomology and Plant Quarantine, Washington 25, D. C.

NEW HAMPSHIRE

Summary of General Nursery-Stock Shipping Requirements
(N. H. Rev. L. (1942), ch. 225, secs. 5-6)

Definition of Nursery Stock.--All woody plants and parts thereof capable of propagation, whether wild, cultivated, or greenhouse-grown; and strawberry plants. The inspection certificate is not required for cut flowers or for herbaceous plants or bulbs.

General Shipping Requirements.--All nursery stock moving into New Hampshire should bear on each package an unexpired certificate to the effect that the contents have been inspected and appear to be free from all dangerous insects or diseases.

If nursery stock is brought into New Hampshire without an inspection certificate, it must be returned by the consignee to the consignor at the latter's expense, or the consignee must call the State inspector to inspect it.

New Hampshire maintains no State plant quarantines affecting interstate shipments.

The foregoing summary was reviewed and approved on February 4, 1952, by J. G. Conklin, State Entomologist.
